## Oyen School Fair Thursday, September 18

At a meeting held at the home of Mr. E. J. Scott on Saturday evening, August 30, the following committees were appointed to be in charge at Oyen school fair, which will be held on Thursday, September 18.

Vegetables—Mrs. G. Langmuir, Mrs. C. Stewart.  
Live Stock—Dr. J. P. Kerr.  
Grains and Weeds—Mr. Thomas Lees.

Poultry—Mr. D. Warwick.  
Cooking—Mrs. H. B. Johnson, Mrs. C. L. Dunford.

Sewing—Mrs. C. P. Snyder, Mrs. A. E. Johnson.

Industrial Art (grades 1 to 8 inclusive)—Miss Clarke, Mrs. O. A. MacArthur (High School)—Mr. E. G. Evans.

Pennmanship and Composition—Miss Lynett.

Elementary Science and Geography—Mr. J. P. Rorabek, Sports—Messrs H. R. Chapin, E. G. Evans, G. A. Morrison, P. A. Watrin, W. J. Byler, D. Warwick and S. Martin.

Fair Day Manager—Mr. C. L. Dunford.

Grounds Supervisor—Mr. J. Green.

Cocoa for schools—Mrs. W. T. A. Walker, Mrs. J. B. Lowe and Mrs. T. M. Nunn.

As in past years, one of the features of the fair will be the schools parade.

The public are invited to give special prizes or contribute to the prize fund. Anyone desiring to respond to this invitation is asked to communicate with Mrs. S. A. Miller, acting secretary.

## Cold Week-end Followed By Warm Sunny Weather

After sweltering heat for over a week the weather turned dull and cool Saturday. By evening the thermometer was registering on the freezing point, and during the night the mercury dropped several degrees into the frost zone. Cool weather followed through Sunday and another frost occurred during Sunday night.

Potatoes, tomatos, vines and all other types of tender garden stuff have wilted and turned black and the wood and coal pile came into real demand over the week-end as a result of the frost.

The weather improved Monday with a light sprinkle about noon. At dusk, the thermometer was registering well up in the forties. Yesterday was bright sunny and warm, and threshing operations were practically general.

## Baseball in the Big Leagues

Not for several years has the struggle for supremacy in the National baseball league, been as keen as in the present season. Chicago, at present in the lead, is being seriously threatened by New York (Giants), Brooklyn and St. Louis, second, third and fourth place teams respectively.

In the American league, Philadelphia is leading by a comfortable margin over the second place Washington and the third place New York (Yankees).

Wilson (Chicago Cubs, National) is running Babe Ruth (New York, American) a nip and tuck race for the home run honors, and is at present leading Ruth by 2. (46-44).

## LEGAL NOTICE

### MORTGAGE SALE OF FARM PROPERTY

Under and by virtue of the Powers of Sale provided by the Land Titles Act, under a certain mortgage which will be produced at the time of the sale.

There will be offered for sale by public auction at the Post Office in the Village of Oyen in the Province of Alberta, on Saturday the 27th day of September 1930, at the hour of two o'clock in the afternoon, the following property, namely:

The north half and south west quarter of Section 24 (2) in Township twenty-nine (29) Range three (3) West of the Fourth Meridian in the Province of Alberta, reserving unto the Crown all mines and minerals. Terms of the sale to be 20 per cent cash at the time of the sale, and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendors solicitors.

The above property will be offered for sale subject to a sealed reserve bid and free from all encumbrances, save taxes for the current year.

The vendor is informed that the above property is situate about seven and one-half miles from Benton and that improvements consist of frame house with lean-to, frame stable with lean-to, frame shed, and three frame granaries. There is a well on the property, and 32 miles 2 wire fencing and 11 miles three wire fencing. Soil is clay loam with clay subsoil and four hundred acres have been cultivated.

For further particulars and conditions of sale, apply to BROWNLEE PORTER GOODALL & HANKINS, 401 Longwood building, Calgary, Alberta.

Dated at Calgary, this 1st day of April A.D. 1930

Approved (Sgd.) W. FORBES,

Registrar.

BROWNLEE PORTER GOODALL

Vendors Solicitors.

## School Opened Tuesday

Oyen public and high schools opened Tuesday morning, with all the teaching staff present. After the usual routine work incidental to the commencement of a new term, and receiving instructions re supplies and books required, pupils were dismissed for the balance of the day.

## Yes We Have Not Seen a Snake Today

Oscar, a fourteen foot python is an absentee from his cage at the Canadian National exhibition in Toronto. He left his home early Monday and has not yet returned, the rascol.

"Have you seen any snakes today?" is a stock phrase at the exhibition these days.

## IN LIGHTER VEIN

Striking a Balance—The wife had been put on the budget plan. At the end of each month she and her husband would go over the accounts together. Every once in a while he would find an item, "L. O. K. \$3," and a little further on, "L. O. K. 80."

Finally he said, "My dear, what is this—L. O. K.?" "Lord only knows," she replied.—Boston Transcript.

An up-to-date prestidigitator no longer takes rabbits out of silk hats; not on your life; he pulls out promise golf courses.—Chicago Tribune.

Carload of B.C. Preserving Fruit on track Monday, Tuesday and Wednesday next. For prices see Circular.

MEMBER OF

## S. A. MILLER

## A MOMENTOUS TIME!

The fate of the Wheat Pool now rests entirely with the Pool members.

The Pool will triumph over all obstacles if the membership remains steadfast and unwavering by idle rumor.

The struggle is now at the hardest part, and the loyalty of every Pool member is of urgent importance. The result of the issue lies with the membership.

The safest place for your wheat is in the Wheat Pool, and it should be delivered to Pool elevators.

## AN EASTERN OPINION OF WESTERN FARMERS

(Mail and Empire, Toronto)

"To suggest that the farmer of the west is going into wheat bootlegging by wholesale and thus break up the Pool he created, is to suggest that the western farmer is a wheeler and a dealer. The western farmer is not going to violate the sanctity of his contract, break his pledged word, destroy his bond—just because somebody with an axe to grind and not sufficient understanding to put an edge on it paints of his 1930 crop future a picture more dark and troubled than the facts warrant."

## Deliver Pool Wheat to Pool Elevators!

## Say You Saw It in the News

## Announcement

I wish to announce that I will open my display of

## Fall and Winter Millinery

in the building formerly occupied by S. Erskine, Main Street, Oyen, on

Wednesday September 10

Many beautiful models reasonably priced.

Mrs. R. E. Gillespie

## Tea is a minor expense why not drink the finest

### Getting Back To Nature

Summer vacation days are practically over and boys and girls, youths and maidens are getting back to their school books and studies while father returns to his office or store and mother to her varied household activities. If these vacation days have been sunny and sensibly spent the result is that those who have enjoyed them go back to their studies or work refreshed in mind and body, physically strengthened, more alert mentally, and in every way better fitted for the duties that lie ahead, with stored up energy from the life-giving rays of the sun to carry them through the shorter winter days.

A well spent vacation, however, means more than this, especially for the young. There is no period, no one month or day throughout life, when our education is complete, as we are not learning something, absorbing some new and possibly lasting impressions, storing up additional information, gaining in knowledge. Because for a few weeks or months we abandon the school room and text books for a camp in the woods, or a motor trip, or a sojourn in the mountains or by the sea, does not imply that during such time our education comes to an end. Quite the reverse is true.

Indeed, living for a few weeks in a summer cottage by one of our lovely western prairie lakes, boating, bathing, fishing, rambling through the woods by day, watching the glorious sunsets and beautiful dawns, lazing on the grassy slopes, contemplating the lake-begirted sky at night, living the simple life, both in food and dress, one is inclined seriously to question whether in this intense, highly organized, mechanical age, we are not beginning to lose some of the best things in life, and to substitute the artificial for the natural.

For example, are we not responsible for our educational system, the training of our boys and girls for their life work, not missing something very vital and important in their programme of studies? Nowadays we take a boy or girl at the age of six or seven and introduce him and her to the great realm of books. This early in life we open up to them the world of letters, and from that time onward the tendency for the child to turn only to books or to their teachers using text books, as the source of all information. Boys and girls may thus become great students of books, but they lose the greater pleasures, the romantic, the imaginative, the adventurous, the free study and observation of nature itself and the wonderful works of nature.

The writer confesses that he always liked the ideas and ideals and programme back of the Boy Scouts and Girl Guides movements, the training of youth in the art of close observation, of learning by doing. We like the idea of our Canadian boys and girls obtaining a knowledge of our flowers and trees, our birds and beetles and flies, yes, even our weeds, from nature itself rather than from books; we like them to recognize the evening star, and the dipper, and the north star in the great space of the sky overhead rather than in a diagram in a text book; we prefer they should know how to build a trustworthy footbridge over a stream they may have to cross rather than be forced to go miles out of their way to find a concrete or steel structure; we like to see them capable of starting a camp fire in a few minutes, cooking their own food, setting up a tent, making a bed with boughs, leaves and animal skins, or of learning by doing. We like them to be able to start a fire, to be able to start a fire, to be able to start a fire.

Book knowledge should come, it must come; it is absolutely essential. But are we not making the mistake of relying almost wholly on books in our task of education and neglecting the great outdoor and business life which nature alone presents to us? Is not the early education of our Canadian boys and girls too academic in character, and not quite practical enough?

Nature study in all its many branches is much more interesting to the average boy and girl in their earlier years than is book study, and the lessons they learn from nature, coming in contact with these when much book learning is forgotten. Furthermore, the traits and characteristics developed through close contact with, and study of nature's own methods, are traits and characteristics which create habits of observation and initiative that will be found invaluable in life, irrespective of the professional or business life which one may ultimately engage, and they are real assets which are not so easily found within the covers of books.

Canada is a land of beauty and variety. Nature has been bountiful in her gifts to the Canadian people. It behooves us, therefore, to give our boys and girls every opportunity to observe, study and appreciate these beauties, to live and learn among and from them. Vacation days are happy days, but they are also, in the writer's humble opinion, among the most valuable of all our days of learning. There should be a way found to fit them more closely into our educational system.

### Egg Laying Record

The Oyster Holds Undisputed Claim To This Record

The world's egg-laying record, 25,000 in one second, 115,000,000 in 70 minutes, 600,000,000 in a year—all by a female oyster—is claimed by the oyster.

The feat was reported to a gathering of biologists, international republic, civic state and federal health authorities and shellfish commissioners from several states at the convention of the National Association of Shellfish Commissioners and the Oyster Growers and Dealers Association of North America, Inc.

### Money For Farmers

Approximately \$1,000,000 being distributed among farmers of Saskatchewan who were shareholders in the Saskatchewan Co-operative Elevator Company, Limited.

Fineness of meat is the first requisite of real beauty.

### Harvesters

You'll find Minard's a certain relief for still or sore muscles. Rub it in and the pain disappears.

W. N. U. 1853

### Menace To Motoring Public

Outdoor Car Is Becoming Peril On Modern Highway

The "One Horse Shay" made famous by Oliver Wendell Holmes ran its course and then suddenly disappeared into atomic dust. Old cars are not so successfully disposed of, and unless some used-car dealer with the gratitude of the motoring public by committing them to the junk pile they continue to obstruct traffic on the highway until they collapse in a heap of scrap at the roadside.

There is nothing romantic, uncanny or even interesting about the final chapter of the outdoor car. Too often there is tragedy in the concluding lives.

The old, out-of-date, decrepit gas wagon is more than a problem—it is a peril.

It now costs \$25 in Old London to impede traffic by trying to operate an old car that should be on the junk heap. Public opinion will eventually ban such vehicles from our busiest highways, for they are certainly a menace not only to the owners, but to the motoring public as well.

"Did your husband follow my directions? Did he take the medicine I left for him religiously?" "I'm afraid he didn't," doctor. In fact, he swore every time I gave him a dose."

New Zealand is said to be the healthiest country in the world. The average expectation of life in that country for men is about 65 years and for women 65 years.

### No Reciprocity

British War Veterans Will Have To Pay \$10 Visa Fee

Eighteen British war veterans, coming to the United States for a convention next month, will be required to pay the usual \$10 visa fee each, despite Great Britain's courtesy a few years ago in admitting several hundred American Legionnaires without charge.

Sir Ronald Lindsay, British ambassador, was informed in a note made public recently that the State Department regretted its inability to comply with his request for a blanket visa, but that the law gave it no alternative. A formal reciprocal agreement would be necessary, the State Department informed Sir Ronald.

## Bright Eyes, Rosy Cheeks

### The Birthright Of Every Girl

Dull eyes mean misery and weakness—a sure sign of a bloodless condition. Anemic girls and women have dull, heavy eyes and look tired underneath. The bright eye of girls and women is the sign of health.

There is one way to make the eyes bright—to bring the glow of health to the cheeks—this is to invigorate the body with new blood—rich, red health-giving blood. Dr. Williams' Pink Pills do this and they do it well.

Concerning them, Mrs. Robert Duff, Pink Pills says: "My daughter became so ill and nervous we had to take her out of school. She was pale and thin; her eyes were dull and the doctor said she was anemic. After giving her Dr. Williams' Pink Pills and less than six months you would not know her. She gained in weight and strength and is now the picture of health."

Dr. Williams' Pink Pills are sold by medicine dealers, or by mail at 20 cents a box from "The Dr. Williams' Medicine Co., Brockville, Ont."

### Makes Air Record

Pilot in Northern Alberta Flies 1,500 Miles in One Day, Making Five Stops

The latest of many air records in Northern Alberta was recorded the other day when Captain W. N. Sherlock, of Commercial Airways, flew 1,500 miles in one day, making five stops en route for the delivery of letters and packages. The trip was made from Port McMurray to Edmonton, then to Fort McMurray, Port Simpson, Fort Norman, Fort McPherson and Arctic Red River. Captain Sherlock's route from Cumberland, England, and is a former member of the R.A.F.

Miller's Worm Powders prove their value. They do not cause any violent disturbance in the stomach, but griping, but do their work quietly and painlessly, so that the action of the worms is imperceptible. Yet they are thorough, and from the first their action is imperceptible in the condition of the sufferer and a result of manifestations of internal trouble.

### Chain Letters

New Flood Of Chain Letters Cause Trouble To Postal Authorities

London, postal authorities are again fighting a new flood of chain letters. The latest of them begins with the names of Charles Linburgh, Colonel Edwards, Bernard Shaw, John Barrymore, Dorothy Dix and Ramsay MacDonald. By the letter, one is given to understand that all these celebrated people have written nine letters to nine other people.

A subtle thread of sudden death to anyone who fails to carry on the chain is hidden in the wording.

Inhalo Minard's Liniment For Asthma.

### Beautifying Stations

The campaign launched this season by the Canadian National Railways in the beautifying of its station grounds, was a successful move. With a result that a greater appreciation will be considered for the work next year.

A. A. Tisdale, general manager, announced.

At one time recently there were 200,000 dogskins at Chinese ports awaiting shipment to other countries.

Automatic telephones have just been installed in Singapore, British Malaya.

## HEADACHE?

Why suffer when relief is prompt and harmless

Millions of people have learned to depend on Aspirin tablets to relieve a sudden headache. They know it so the pain so quickly, And that it is so harmless. Genuine Aspirin tablets never harm the heart. Read directions in package for headache, neuritis, summer colds, pain of all kinds.

## ASPIRIN

A Wonderful Man

Sir Wilfred Grenfell "Father" Of Labrador Is Well Named

"That wonderful man, Sir Wilfred Grenfell, the leading Canadian surgeon of Labrador, will shortly be visiting London, when a Mansion House meeting will be held in his honor."

A doctor by profession, he has a passionate love for the sea, and has done much for the benefit of North-western fishermen.

In 1892 he went to Labrador, where he built five hospitals, seven nursing stations, two orphanages, two large schools, several co-operative stores, in addition to setting off foot much industrial work. In short, he has performed a revolutionary work.

Although 65, he still takes an annual cruise in one of his hospital steamers, the "Norman" and "St. John's," and is a member of the Royal Canadian Mounted Police. His work in Labrador is carried on under four committees, one British, one Canadian, one Newfoundland, and one American.

He is an Oxford man, and played for the Oxford team in the Rugby football team. In 1920 he became Lord Rector of St. Andrews University.

He is an Oxford man, and played for the Oxford team in the Rugby football team. In 1920 he became Lord Rector of St. Andrews University.

### Recipes For This Week

(By Betty Barclay)

#### SMOR RINGO COOKIE

1 cupful butter.  
1/2 cupful sugar.  
Yolk of 1 egg.  
1/2 cupful almond flaking.  
1/2 cupful milk.  
1 teaspoonful baking powder.  
Pinch of salt.  
Flour.

Cream sugar with the butter; add the beaten egg yolk, milk, salt, and flavoring. Sift baking powder with 1 cupful of flour. Add more flour until a dough is formed that is easily handled. Roll quite thin, cut in strips, then twist and form in circles.

#### BAKED WINTER SQUASH

Wash the squash, cut and remove seeds and pulp. Then cut squash in squares and place in a pan containing a little water. Place in a moderate oven and bake until the pulp is soft, basting occasionally with a little hot water and butter. When nearly done sprinkle lightly with brown sugar and dot with butter. Finish baking and serve a square to each person.

#### Replaced the Breakage

Elderly Woman Is Made Happy By Gift Of Prince

Miss Raymond, an elderly and humble resident of the south of London, has been made happy by a kindly act of the Prince of Wales.

She lives in a hotel in the neighborhood of the cricket ground where the Prince went to attend the England-Australia match.

During an interval in the play the Prince and a party of friends visited her hotel and one of the old lady's vases accidentally was overturned and broken.

The next day the Prince sent a colored statuette of himself in hunting costume, accompanied by a letter regretting the breakage, and hoping that she would accept the substitute instead.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Worm Expeller, Worm Expeller, an excellent remedy.

British Columbia Minerals

A report of Hon. W. A. Mackenzie, Minister of Mines in British Columbia, shows an increased quantity production in the aggregate of minerals and metals, though the dollar gross value dropped from \$28,772 in the first half of 1929 to \$29,080,487 for the half year of 1930.

Great Barford, where the first inquest held in England was recorded in 1100, has just had its first death inquiry in 19 years.

Minard's Liniment for Cuts and Abrasions.

### British Rule In India

What England Has Done and Can Do For People Of That Country

"Downstream" writes as follows in the Canadian Churchman: "The achievements of England in India during the last century, I think I may safely say, constitute one of the brightest pages in the history of our race and Empire. Like all human records, it is not of course without its blot. But I think it has on the whole fully justified Macaulay's glowing words in his celebrated essay on the character and work of Lord Clive. 'If in India the yoke of foreign masters, elsewhere the heaviness of all yokes, has been found lighter than that of any native dynasty, if that gang of public robbers that once spread terror through the whole plain of Bengal has been succeeded by a body of functionaries not more highly distinguished by ability and diligence than by integrity, disinterestedness and public spirit, if we see men like Munro, Elibank and Metcalfe, the leading members of our armies and our honours, return proud of their honorable poverty, the praise is in no small measure due to Clive.' But to me, and I believe to the great majority of Britons throughout the Empire, England's contribution to the civilization of India is not to be measured by the material progress of the inhabitants of the Indian Empire, but by the moral progress of the Indian people, and should the event demand it, ultimate independence."

"Downstream" writes as follows in the Canadian Churchman: "The achievements of England in India during the last century, I think I may safely say, constitute one of the brightest pages in the history of our race and Empire. Like all human records, it is not of course without its blot. But I think it has on the whole fully justified Macaulay's glowing words in his celebrated essay on the character and work of Lord Clive. 'If in India the yoke of foreign masters, elsewhere the heaviness of all yokes, has been found lighter than that of any native dynasty, if that gang of public robbers that once spread terror through the whole plain of Bengal has been succeeded by a body of functionaries not more highly distinguished by ability and diligence than by integrity, disinterestedness and public spirit, if we see men like Munro, Elibank and Metcalfe, the leading members of our armies and our honours, return proud of their honorable poverty, the praise is in no small measure due to Clive.' But to me, and I believe to the great majority of Britons throughout the Empire, England's contribution to the civilization of India is not to be measured by the material progress of the inhabitants of the Indian Empire, but by the moral progress of the Indian people, and should the event demand it, ultimate independence."

## Mixed Farming

Arguments Advanced in Favor of Mixed Farming Are Convincing

The crisis in wheat farming in Western Canada is having a good effect, at least, it is causing those interested to take stock of the situation and devise appropriate remedies. If year after year abundant crops were harvested, and no difficulties were encountered in marketing them at profitable prices, the result would inevitably be that, sooner or later, the soil would become exhausted, and that would eventually mean only one thing—the death of the goose that lays the golden eggs. The suggested expedient of cheapening the cost of production through mechanization of farm work does not prove effective as a temporary remedy. The Calgary Herald, which ought to make helpful suggestions, finds the solution of the problem in mixed farming, which would result, it says, as it has done in Europe, "in increasing the fertility of the soil, prevention of soil drifting, and a natural reduction of the volume of wheat grown in competition with the Argentine Republic, Australia, India, the bonused wheat of Germany and France, and later the ever-increasing wheat yield from a mechanized Russia."

It is pointed out that at present Canada imports large quantities of butter and eggs, mainly from New Zealand, and a certain amount of wheat. There was a time when butter and cheese sold in the market for less than the cost of production in the Dominion, and this was a conspicuous by-product of the war. With the abrogation of the Australian and New Zealand trade preferences in favor of butter importations from those dominions, there is no reason why butter production in this country should not become an important part of mixed farming activities. In short, the arguments in favor of mixed farming on a much more extended scale than at present present as so convincing that the plea of the Calgary newspaper to western farmers, "to look into the merits of the proposition, with a view to getting away from an impossible situation," is deserving of very careful consideration.

## Marketing Poultry

Marked Between the Balance of the Year Will Be Restricted

"The poultry market during the balance of the year is going to be a trying one, perhaps the most difficult through which the industry has passed in recent years," observed experts of the Poultry Market Service of the Dominion Department of Agriculture. Not only are storage stocks heavy and production fully up to normal, but the market in which dressed poultry can be sold to advantage is materially restricted this year through the new United States tariff barrier. Producers are urged to pay particular attention to the proper fitting of poultry for market, and to the development of the type the consumer wants. Poultry should never be marketed without having been properly finished through careful feeding, and young stock should never be put into finishing pens until fully grown and properly matured.

## Secure Wheat Prices

Herman Treble, of Wembley, Alberta, former wheat and oats king, won first prizes at the Regina Exhibition, for his exhibits of Marquis and Red-wheat. William Darnborough, of Laura, Saskatchewan, was second in the Marquis class, while E. Thompson, of Pithou, Sask., came just behind Treble in the Howard class.

Little Doris: "Mummy, what is a Civil Servant?"  
Mother: "It's so long since we had one that I've forgotten darling."

Northern outposts of Canada received 100,000 pounds of mail and express by aeroplane last winter.

Germany has produced paper clothing which is waterproof, washable, and holds its shape.

"Dad, I want to set up the motor-cycling record."  
"You have done that. This year you have been in hospital five times."

## Sea Area With No Oxygen

Furns Effective Barrier To Wanderings of Beasts of the Ocean

A place was found in the tropical waters of the Pacific Ocean, on the last voyage of the non-magnetic ship "Carnegie" where there is practically no oxygen. O. W. Torrey, navigator and executive officer of the ill-fated vessel, said in a radio address recently.

This discovery, Mr. Torrey said, was only one of a number of important scientific findings made on the final trip of the ship, which started in Washington, in May, 1928, and ended when he burned in the harbor of Apia, Samoa, in November, 1929. During those 19 months more than 30,000 miles were travelled in the North Atlantic and the North and South Pacific. Captain Torrey said, making a total of nearly 350,000 miles, equal to 14 times the circumference of the earth, in the 20 years' life of this floating laboratory.

The spot where no oxygen in the Pacific is of such extent that scientists may well conclude that it is an effective barrier to the wanderings of ocean creatures which live in the lower water levels and which always need this precious gas of life. Mr. Torrey said, beginning 300 feet below the ocean surface and extending downward for 1,000 feet, this was a band one hundred or more miles wide and extends for a great distance to the east and west. It was found during the regular soundings of the scientific staff aboard the "Carnegie," when measuring the depth of the ocean and studying its life and content.

## Fix Soybean Value

Some 24 Varieties Of Soybean Found Suitable For Cultivation In Canada

The commercial demand for soybean oil or meal from time to time will fix the value of the various varieties suited to cultivation in Canada is the observation of the Chemist of the Dominion Department of Agriculture. The correlation between "oil" of fat content and protein he finds is remarkably consistent; the varieties being high in "fat" being relatively lower in "protein," and vice versa. This becomes a matter of importance in view of the fact that there are now some twenty-four varieties of soybean which have been proven suitable for cultivation as a commercial crop in Canada. The commercial value of the soybean arises from the oil obtained by expression, and the use of the residue of the bean, which is rich in protein, in the form of meal or cake as a livestock food. Soybean oil is used in fish farming, paint and soap manufacture; and the soybean is also an important constituent in many of the popular patent foods now appearing on the market—in addition, as a legume and forage crop it ranks among the best.

## Treaty Payments Made

Treaty payments have been completed on the Indian reserves throughout the west, said W. M. Graham, commissioner of Indian Affairs. A northern party which left in June on a ten-week trip to reach Indians in the far north, is expected back shortly. They will have travelled about 1,500 miles by canoe, starting from Big River in Northern Saskatchewan.

## Industrial Satisfaction

According to Roy Brown, president of the Saskatchewan Board of Trade (writing in "The Hub"), there are a total of 197 industries in Saskatchewan, including 52 factories, 52 branch factories, and 66 distributing plants.

## Sketches Noted Surgeon

Sir St. Clair Thomson, M.D., F.R.C.P., noted British surgeon, who is known throughout the British Isles and Europe as the "joy" of Laryngology, as he appeared to A. F. Meers, talented young steward of the Canadian Pacific liner "Duchess of Bedford" upon which ship Sir St. Clair, together with the other members of the British Medical Association, travelled recently to Montreal, on his way to Winnipeg, where the joint convention of the British and Canadian Medical Association was held.

## The R-100 Buys The Best

Purchasing Agent Buys Best Government Branded Beef

"Everything that we can, we have room for nothing but the best," was the comment of the purchasing officer of the big British dirigible R-100 when discussing with beef grading officials of the Dominion Department of Agriculture the question of meat supplies for the return trip to Cardington. He expressed immediate appreciation of the opportunity in Canada to buy the best beef by government brand with its guarantee of real quality. When her visit to Canada ended and R-100 cast off her lines for the flight home she carried on board a supply of choice "Red Brand" individual steaks sufficient for two meals for all on board. The government brand removes the element of guesswork as to quality entirely from the purchase of beef throughout Canada, and every housewife, by insisting on being supplied with Red or Blue brand beef can buy the best of beef with the same assurance of quality as did the purchasing officer of R-100.

Better to be able to appreciate the things we cannot have than to have things which we are not able to appreciate.

Nearly 46,000 people in Switzerland now are employed in the watch and jewelry industry.

A business firm established 22 years ago is still flourishing at North Walsham, Norfolk, England.

Icebergs in the North Atlantic float with only about one-sixth of their mass above water.

When you cheat you cheat yourself.

Two distinguished visitors

The photograph reproduced above shows Viscount and Viscountess Dunsin, two distinguished visitors with the party of eminent British jurists at the annual meeting of the Lord Dunsin is senior Lord of Appeal in the Ordinary and Keeper of the Great Seal of the Principality of Scotland.

## Furbishing the Tomato

New England Co-Operative Association Has New Idea

Even the tomato feels the need of dressing up. It is almost like painting the lily to attempt to add anything to its glistening red jacket, sparkling so brightly of lusciousness within, but now some enterprising farmers have organized a co-operative association to market their entire tomato crop under the New England quality products label, the fruit to be graded and sold in glass-paper covered bushel boxes.

That is what co-operation can do. No doubt the "quality" tomatoes will fetch a higher price, just as scrubbed carrots and parsnips bring a better figure, although they all come out of the pot looking about the same as their more plebeian brothers, which the grocer delivers incriminated with the soil that gave them their succulence.

The man who first drew higher prices in a cellar to give it a darker richer red, and then tied the stalks into neat bundles with a bright red ribbon, had an idea. So did the potato grower who selected the most round of his product, scrubbed them clean and another with a brush, then wrapped them singly in glass paper and sold them at five cents each as "fancy bakers."

The apple man, and the peach growers had already learned that the people look by the eye as much as, if not more than, by the palate.

While winking vendors of the spruced-up home appliances are their undertaking, one would wonder more gladly some way by the United States of America, to rot to rot on the vines because of too low a price, could be made available to those who would utilize them as they selected the most round of his product, scrubbed them clean and another with a brush, then wrapped them singly in glass paper and sold them at five cents each as "fancy bakers."

# Periodic Health Examinations In The Future To Guard Against Unnecessary Illness

(By John Burke Ingram)

Should doctors be paid for health examinations? To this seemingly foolish question a friend of mine replied: "Certainly! That's what doctors are for."

Is it?

Do you remember the old, old fable about the way the Chinese pay their physicians? Only when the patient is well is the doctor paid. Thus the interests of patient and doctor are identical. Smart people, those Chinese! Today we are trying to work out some such system in the name of "Preventive Medicine." Today the attitude of the doctor towards disease is changing.

Vaccination against smallpox started that change. Before vaccination, doctors existed solely to cure. With the coming of vaccination they began to prevent illness.

Vaccination has been followed by similar discoveries. It is now possible to "vaccinate" the whole insect menaces, is correct in general sense) against diphtheria, typhoid fever, scarlet fever, measles, polio, and other diseases. Almost every year sees another one or two additions to the list of preventable diseases. And year by year the falling death-rate from tuberculosis proves that preventive medicine is effective in combating many of those ills of the flesh against which no specific has yet been discovered.

The most significant recognition that has been given to the principle of preventive medicine has been the organization of public health departments. The function of every public health office is not to cure disease, but to keep the public healthy. And more and more this is becoming the function of the practicing physician, too.

What is to happen to the average doctor when all—if not most—of the Acapulcan upland in which there are no sick people left to heal? This, asks Dr. Gordon Bates, who writes on the question in the current issue of the Canadian Public Health Journal, will be most happy. For instead of having those masses of sick to heal, he will have millions of well folk to keep well! Truly a more congenial, as well as a more profitable state of affairs, to the doctor and patient.

Fear of all the illness in Canada is preventable, he says, and over 30 per cent of our deaths are preventable. The direct cost of illness, he places—from conservative estimates made by public health officials from coast to coast—at \$300,000,000.

He visualizes a day when a mother, instead of philosophically hoping that her offspring will have their share of children's diseases early and get them over with, will consult her family physician and arrange with him to have the children vaccinated against these diseases so that they won't have them at all. A much less expensive, less annoying, less dangerous procedure. He points out that though Canada has annually about 150,000 deaths from diphtheria, and 15,000 from typhoid, preventive medicine could cut the toll of this disease by 95%—and that it fails to do so largely through ignorance or neglect of parents, since diphtheria is principally a disease of childhood.

"But what other phases are there to the adoption of preventive medicine by the general practitioner?" Dr. Bates asks. "One thinks immediately of the periodic health examination idea."

"Many illnesses which have resulted in death might have been prevented had the physician had the opportunity of acting in the incipient stage of the disease in question. An early medical check or test might have shown early death, cancer, syphilis, tuberculosis may result in death because of neglect when the symptoms are slight, and these are only examples."

"Is this place healthy?"  
"Rather! I couldn't wait when I came here."  
"What have you been thinking?"  
"No, I was born here."—Buen Humer, Madrid.

W. N. U. 1653

## Causes Of Drought

Scientists Say Storm Track Has Shifted Northward

Increments of meteorological information are but poor compensation, owners of gathered crops will insist, for this summer's exceptional drought, yet that information is about the only feature of the weather which can be set down on the printed ledger. The last comparable condition, says the New York Herald-Tribune, seems to have been in 1874, when but few weather observations were maintained and anything like the present world maps of weather was still a dream. This summer for the first time weather scientists have before them in drought time even a partial picture of what is happening to the oceans and air currents and other brewers of storms or droughts. Superficially, the answer to the query "Why the drought?" is straightforward. There has been persistent high air pressure over most of the northern hemisphere, which kept out the moisture-laden winds from the oceans on both coasts, for winds tend to blow outward from areas of high, never inward toward them.

The true problem, however, is the cause of this persistent high pressure. It is too soon to read this with assurance. The European weather maps, for example, come by mail and are ten days or two weeks late in American laboratories. Yet one fact can be discerned from the maps for the future. If they are called the storm track has shifted northward. Most of the rain in North America is provided by the cyclonic storms which sweep across the continent from the Pacific to the Atlantic every few days in winter and at long intervals in summer. These storms cause moving areas of low pressure; the low pressure draws in winds both from the north and the south; these winds mix; the cold north winds precipitate the moisture from the warmer southern ones. That, in a sentence, is the cause of America's rain.

Ordinarily these recurring storms follow a track which crosses the northern third of the United States. Since July 20 not one of these storms has done so. They have not vaulted inspection of Canadian records show. They merely have been swinging farther north than usual, crossing the Hudson Bay region and providing the more ample rains which Canada has received. The wheat and corn belts of the United States have been left south of the storm track untouched by the mixture of winds which might have brought rain.

The step back that this line another question. Why has the storm track swung farther north? Here authorities differ, but Herbert Janvin Brown, weather forecaster of unofficial status but of substantial success, has an idea. The ultimate cult, he believes, is the moon, which in its swings southward and northward in successive decades affects the tidal equilibrium of the oceans and thus the winds on land.

The cycle of moon motions which now is occurring repeats, Mr. Brown points out, that of 1913 and 1974 is a year of drought. As a scientific guess, this is perhaps the best now available. But most weather claims to be made before a certain conclusion can be reached.

## All He Knows

The patient scholar had explained some of the modern habits in common phrases and talked much of bang and war and radio and what not.

"Herbert," she demanded suddenly, "what are some of the signs of the time?"

"Keep Out, No Fishing, No Hunting, No Treasures," said Herbert.

## Beef Grading Policy

Attracting Attention On The British Market, Report Shows

The beef grading policy of the Dominion livestock branch is not only providing a real service to the Canadian consumer and producer in clearly identifying the true quality of beef, but is also attracting attention in the British markets, reports show.

The Imperial Food Journal, a recognized authority on market conditions in the Old Country, says: "The introduction of beef grading in Canada, whereby the top grades are marked for the information and protection of the public, is doing much to strengthen the demand for the better qualities of beef. This should tend to promote the raising of better grades of cattle and the finishing of animals."

## Cattle For Old Country

Shipment Made During August Was Just For Experiment

On August 21st, for the first time in over three years, a shipment of Canadian cattle left Canada for the United Kingdom. This shipment of forty head is an experiment that will be watched with interest by exporters, as by eastern, cattle raisers and shippers. That is, because the United States border has been closed to our cattle, it becomes all the more desirable to revive the lapsed business with the Mother Country. It is probable that, if shipping facilities can be arranged, sixty thousand head can be sent across the Atlantic this year. This is not the first time that the American Republic, by sudden fiscal departures, has forced us to look to the British family circle as an outlet for our farm products.

## Co-Operative Wool Growers

Over 3,250,000 Pounds Of Wool Received At Toronto Warehouse

A recent check-up by the Canadian Co-operative Wool Growers shows that well over 3,250,000 pounds of wool have been received at the Toronto warehouse since the start of that point this season. Another 250,000 pounds are expected; so that the objective of 3,500,000 pounds decided upon at the last annual meeting of the organization when contract handling was adopted is going to be well exceeded. Alberta furnished over 1,500,000 pounds, while Manitoba, Saskatchewan and Ontario, each contributed about half a million pounds. British Columbia made an unusually good showing with 335,000 pounds, while Quebec and the Maritimes brought along another 150,000 pounds.

## In Business For 70 Years

The old village of Bath, near Kingston, where United Empire Loyalists settled more than 140 years ago, has a resident, Robert Mott, aged 81, who is still active, and has been 70 years in business. He is still conducting a general store, assisted by his wife and son. From 1960 until 1970 he was in the harness and carriage business. Some of his forebears reached great ages, his grandmother being 101 and his grandfather 90.

## Collect Data On Water Fowl

Many hundreds of voluntary observers throughout North America are collecting information concerning the numbers of water fowl observed on specified days each month. Reports for Canada are forwarded to the National Parks of Canada, Department of the Interior, Ottawa, and to the United States, and to the Biological Survey, Washington.

## He—'I've just made the last payment on our house.'

She—"Good; it's time we bought in a better neighborhood."

# Growing Respect and Good Will That Mark Relations Between Canada and the United States

## A New Idea

New System Of Marketing Meat Known As The Rapid Freezing

Officials of the Dominion Livestock Branch are watching with interest the progress of the new system of marketing meat known as the "package meat" or "rapid freezing" method. It has already been successfully introduced in the larger retail distribution centres in the United States, and bids fair to revolutionize meat retailing methods in the British market. By the new process cuts of beef, mutton, lamb, pork and veal are dressed at the packing plant, packed in individual cellophane wrappers and subjected to rapid freezing at very low temperatures. It is found that by "snap" freezing only tiny ice crystals are formed in the flesh of the meat, preserving all its fine qualities quite unimpaired. The new system provides a serious threat to the future of the old familiar institution, the butcher shop.

(By Anabelle Worthington.)

## Cultivated Forage Crops

Progress Is Made In Pasture Improvements At Dominion Range

The Forage Crop Division of the Central Experimental Farm had a record year in 1929, as evidenced in the report of G. P. McIlwain, Ph.D., Dominion Agronomist—an illustrated booklet of 46 pages. Amongst other things it is noted that considerable progress has been made on a large number of projects pertaining to range management and pasture improvement at the Dominion Forage Experiment Station near Manlyville, Alberta. Much attention has been given to the selection of crops and to the growing of cultivated forage crops in co-operation with a number of ranchers and farmers throughout the Western Provinces.

Manitoba Egg-Laying Contest

What Legions led the Manitoba egg-laying contest at the Brandon Experimental Farm at the end of the 37th week. These birds, owned by J. R. Beer, of Brandon, had a total production record of 1,082.2 points and 1,344 eggs. Barred rocks owned by J. E. Beer, of Leno, Man., for weekly production with 312 points and 43 eggs.

The protracted discussions over naval strength on the part of Great Britain, France, Italy, Japan and this country have led to emphasis on the growing respect and good will that mark the relations between Canada and the United States. No does this statement imply any lack of friendly relations in the past. But the growing state which each country has in the other cannot fail to bring them still closer together. Above all, we feel that the people of this country are coming to have a more and more wholesome respect for Canada as it emerges from its pioneering conditions into a great industrial nation. It is not merely the wealth of natural resources which we admire, as anyone must, but the way in which her capable, industrious and enterprising people are developing them.

During the war, Mr. McAdoo, then Secretary of the Treasury, remarked to a high Canadian official that, in his opinion, Canada was the most productive of the world's war-time capitals. Certainly her heritage is rich and vast. It is true that in ten years of the life insurance in force some \$3,500,000,000 in Canada. But Canada has penetrated the United States as well. One of her life insurance companies is the largest stockholder in at least two of our great corporations and more than \$1,000,000 of the life insurance in force here is held by Canadian companies. Canada is the largest taker of our exports, ranking ahead of any other country in the world. The total value of nearly \$900,000,000 worth of goods in the United States, in turn, by more than \$900,000,000 worth of goods in the United States.

After the war Canada suffered a depression much as we did, and even though we have recovered from it. But these were followed by four or five years of big crops and an extraordinary development in mining, hydro-electric power and the industry generally. Although Canada has only one-twelfth the population of the United States, she is indeed a powerful neighbor, and one whose bargaining ability is extremely great—far beyond proportion to her population. One need mention only her control of the raw materials for paper making, steel, and the Canadian seems to have very real genius in building up financial organizations; their banks and insurance companies are strong.

Canada's population is sure to increase. Indeed, we are adding to it constantly. There is migration both ways, an interchanging of population on a great scale that can only make for mutual respect and good will. In the case of Canada and the United States, there seems to be a mutual conquest or penetration of one by the other. In this instance, business victories carry peace instead of war or fears of war. Few countries have such opportunities as Canada for peace cannot but feel that the extension of these relations into other international fields is to some extent possible.—Saturday Evening Post.

# Honor Heroic Conductor

Tribute was paid recently by Colonel the Honorable Murray MacLaren, Minister of Pensions and National Health, and Colonel C. A. Hodgette, Director-General of the St. John's Ambulance Association, to the heroic action of Clarence W. Leach, passenger conductor on the Canadian Pacific railway between Ottawa and Montreal, who by his prompt action and presence of mind rescued three Montreal firemen from the flames of a burning train. Mr. Leach was standing third from the left and alongside him are the Minister, Colonel Hodgette and J. H. Hughes, C.P.R. superintendent of Ottawa. Presentation of the Honorary Testament of the Royal Canadian Humane Society was made in the Minister's office. Mr. Leach is inset.

## Montreal Unemployed

Montreal at present has between 21,000 and 23,000 unemployed, with another 10,000 to 15,000 working but two or three days a week, according to reports from Labor unions reaching the city hall, it was announced by Alfred A. Mathieu, member of the executive committee. The information will be passed on to Hon. Gideon Robertson, Minister of Labor, who is compiling data on unemployment throughout the country.

Victoria Tower, London, 420 feet high is said to be the highest spire in the world.

## WHEN CHILDREN FRET

There are times when a child is too fretful or feverish to be sung to sleep. There are some pains a mother cannot put away. But there's quick comfort in Castoria!

For diarrhea, and other infantile ills, give this pure vegetable preparation. Whenever coated tongues tell of constipation; whenever there's any sign of sluggishness, Castoria has a sure touch; children love to take it. Buy the genuine—with Chas. H. Fletcher's signature on wrapper.

### CHAPTER XXVIII

As those two in the doorway moved out of the mirror's line of reflection, Grandma lifted compassionate eyes to Jimmy Bennett. She could not speak. Her throat felt parched. Anything she might say would seem inadequate; so it was in silence Jim arose and moved dazedly toward the door that led to the room beyond.

"I'll get out the back way," he managed to say huskily. "You tell her that George K. sent for me. Tell her anything you're a mind to—except the truth. I'll be all right after a minute. . . . Don't worry. . . ."

But he was too late. Charman was back, her eyes still shining as she glanced in bewilderment from Grandma's troubled countenance to the grim face of her old playmate. "Where are you going?" she began, puzzled. "Come back, Jim. Sit down. I've got some news for you. What makes you act so queer?" Then light broke in upon her and she cried: "Oh, look here! Did—did you get that idiot kiss!"

"He checks flamed, but Jim still stood in the doorway. He might have been a statue. He didn't speak; but Grandma answered quickly: "In—in the mirror, dearie. I didn't know that I name you. It must have looked that way. That kiss—"

"You have to have a kiss like that, Charman," Jim broke in gruffly. "It spoke for itself. I wish you happiness, of course; but now. . . . Uncle George is waiting for me. . . ."

The girl drew an exasperated breath.

"Let him wait," she responded.

"You shan't go one step, Jim Bennett. I'll have made you and Grand-

ma understand this thing. Sit still. That kiss was—well, good of a vicar. You kiss, you understand. It was a kiss by proxy, so to speak. It wasn't John Carter was really kissing, but a girl's crossing the ocean of love to come to him—a girl he's adored for ages, though he was too proud to say so—nothing to offer her said—Oh, you know that foolish line of thought.

"It's a long story, too long to go into now, but anyhow, he wrote to her after the old doctor died and he thought he'd be able to get married. His letter came unopened. Then he found from a friend that she had gone abroad. He wrote in care of the American Express, and that letter came back, too. Then he tried Paris, and after following her all round Europe, the letter reached her in London, and she called. It was that message he brought for me to see. She sat at once. Told him to meet her at the dock with a marriage license! Do you wonder the poor boy was a little off his head? He's been half crazy with anxiety, and—well," said Charman, a smile curving her lips. "He just naturally had to kiss some one, didn't he?—and I was handy."

"Handy," echoed Jim Bennett, staring. "Are you trying to tell me that if he'd run into Lizzie Baker he'd have kissed her?"

"I'm sure that he wouldn't," have thought you know, Jim. I've been a—sister to him."

"I shouldn't hardly have thought it from the looks of things," said Grandma with unintentional humor. "At one time I was pretty sure we were going to keep him in the family. How long have you known about this girl, dearie? Why didn't you tell me?"

"If I'd known you were thinking what all the Wickfeld busybodies were thinking," replied Charman, "I suppose I've become accustomed to kitchennets; and in these days when most of us don't keep a lot of secrets, I'll admit that they save steps. Come here to the window, Charman. I want to look at you."

"She smiled at him, but he frowned. "I suppose I've become accustomed to kitchennets; and in these days when most of us don't keep a lot of secrets, I'll admit that they save steps. Come here to the window, Charman. I want to look at you."

"She smiled at him, but he frowned. "I suppose I've become accustomed to kitchennets; and in these days when most of us don't keep a lot of secrets, I'll admit that they save steps. Come here to the window, Charman. I want to look at you."

"She smiled at him, but he frowned. "I suppose I've become accustomed to kitchennets; and in these days when most of us don't keep a lot of secrets, I'll admit that they save steps. Come here to the window, Charman. I want to look at you."

er—well, with all the angles sandpapered. Do you catch my meaning? You'd love her, anyway. It was worth being excited all this time to find an aunt like that, believe me."

"Was that all you found in California?" queried Charman as she measured four into a blue bowl. She was remembering the "girl" mentioned in Lizzie Baker's letter, but Jim answered in all seriousness: (To Be Continued.)

## Body Of Andree Is Found

Remains Of Famous Swedish Explorer Discovered After 33 Years

Out of the Arctic silence has come the grim last chapter of aviation's first North Pole arduous, after 33 years the mystery of how Salomon August Andree, Swedish balloonist-explorer, who set out in an airship, in 1897, for the top of the world, perished with his two companions.

A Norwegian scientific expedition, headed by Dr. S. Horn, has sent word to Oslo that its members had found the bodies of Andree and his mates in a camp of their making, on White Island, which lies east of the Spitzbergen group.

No trace of Andree's balloon had been seen since the expedition left. Andree's diary, his scientific instruments, a few scattered objects which evidently had been muzzled by bears and left untouched, and the bodies of the explorers told the gruesome tale of a battle with the elements in which the Swedish aeronaut had survived his fellows.

Andree was accompanied on his trip by K. Frankel and N. Strindberg, the last of them a handsome youth of 24, professor in a Swedish airplane, engaged to be married with a girl in Oslo. He was said to have returned from this one last adventurous fling before settling down. Despatches reaching Oslo did not readily identify the man whose body was found near that of Andree, and described as well preserved.

Andree, it is said, was on his way to attempt his great Polar expedition from Dances Island, Spitzbergen, July 11, 1897. In the previous year he had failed. He had launched the idea in 1895, thirty-one years before the epochal voyage of Amundsen and the "Norge" across the Pole, according to Andree's old diary.

Upon a desolate tableland, at the base of a high cliff some 500 feet in length, the bodies of the three men were found. The camp of Andree, 70 days a Norwegian sailor, according to a notice from the Hvaler party, was found near the bodies and other effects of the explorers to Norway.

Persian Balm imparts a rare charm and distinction to the woman who uses it. Fragrant as a flower, deliciously cool to the skin, it always results in a complexion as delightful as young and lovely. Indispensable to the care of delicate skins. A powerful base for oily-textured skins or as a beautifying lotion, it is unrivalled. It tones and stimulates the skin, recommended also to soften and caress the hands sweetly with it.

## Fast British Trains

Cheltenham Flyer Attains Speed of 80 Miles An Hour

When I travel from Brighton to London at night, I see nearly always at Victoria Station a few young passengers admiring the huge and handsome engine of the King Arthur class which has drawn the train. Big engines and famous trains still have an invincible attraction for youth—as you may learn at almost any station. British trains, as shown by the summer timetables, are the fastest in the world. The fastest of all is the "Cheltenham Flyer," which is timed to do the 77 miles from Swindon to London at 66 miles an hour, but actually covers the distance on many days at a speed of 80 miles an hour.

Nearly a century ago, Brunel, in this matter of speed was far ahead of his time. He thought 60 miles a mile to aim at, though there were quite a number of his contemporaries who seriously favored the imposition of a speed limit of 15 to 20 miles, for the safety of passengers. "London Daily Mail."

It Has Many Qualities—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat, it will induce sleep, relieve from a sprain, relieve the most persistent neuralgia and will speedily heal cuts and contusions. It is a medicine chest in itself.

The dandelion's name comes from French words meaning lion's tooth, bestowed on the plant because of its toothed edges.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

"Some people have no initiative," says a writer; "they merely follow the lead of those with brains." Led by the known.

Minard's Liniment is a household friend.

## ENO'S FRUIT SALT

### The Safest, Surest Way To Health

The daily dash of ENO in a glass of water every morning is the safest, surest way to remain clean and at the inwardly clean is to be healthy. ENO'S "Fruit Salt" is a delicious health beverage that tones and sweetens the entire system. For constipation, acid stomach, fatigue and biliousness it is without equal. But remember, only ENO can give ENO results.

## Wingless Aircraft

Successful Flight Of Latest Addition To Aircraft Is Reported

The New York Times says a wingless aircraft based on the principles of the celebrated Plittner rotor ship, has been built and successfully flown on Long Island Sound, off Mamaroneck, with the backing of New York capitalists.

The aircraft is described as similar in appearance to a seaplane without wings. A single motor in the nose supplies the traction through a three-bladed steel propeller. An auxiliary air-cooled gyroscope motor supplies power to rotate the cylinders which take the place of wings.

Three rotors are in four sections, two on each side of the centre longitudinal line of the craft. Forward is an out-rigger rudder and behind is a small pair of tandem cockpits. Between the motor and the cockpit, the long booms are used in place of the usual four long ones.

Use Minard's Liniment For Foot Ailments.

## Wool Warehouse Destroyed

Half a Million Dollar Loss Occasioned By Fire At Weston

Damage estimated at \$500,000 was caused by a fire which destroyed the building of the Canadian Co-operative Wool Growers, near Weston, Ont. Charred and crumpled walls containing 300,000 pounds of water-soaked wool were all that remained of the structure after firemen had vainly endeavored to save the structure. The loss was a loss to determine the cause of the fire.

## When Pain Comes

PHILLIPS' COLIC REMEDY

What many people call indigestion is very often merely excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Colic Remedy. It has remained the standard with physicians in the 50 years since its invention.

### Here and There

(258) Successful Canadian exhibitors in the International Grain and Hay Show to be held at Chicago, November 25-December 6, will be awarded liberal bonuses in addition to the regular premiums offered in the prize list now being distributed. The provincial governments of Quebec, Ontario, Alberta, Saskatchewan and British Columbia, the Calgary Board of Trade and the Canadian Pacific Railway have also announced offers of special awards for Canadian exhibitors.

That elk are attracted by music seems to be established by the actions of two fine specimens of that animal which stroll out of the bush when dancing begins at the Banff Springs Hotel every evening. Under the ballroom windows they begin to shake their heads and graze, curvet and nicker while the music lasts, not even stopping to rest until the orchestra has ceased playing.

Canadian poultry are rapidly being recognized throughout the world as reaching unusually high standards and recently the S.S. Empress of Canada, clearing from Vancouver to China, Japan and the Philippines, carried 50 head of registered white Leghorns consigned to Manila to be used in building up the poultry industry of the islands. The birds came from a poultry farm near Vancouver.

Captain E. W. McMurray, for the past five years' marine superintendent of the Canadian Pacific's British Columbia coast steamship service at Vancouver and prior to that a commander with the Canadian Pacific Train-Atlantic fleet, has been gazetted in the London Times of July 14, captain in the Royal Naval Reserve, promoted from the rank of commander. R.N.R. Captain McMurray, whose rank is equivalent to the army rank of brigadier-general, is one of the few living Canadians holding such a high position in the R.N.R.

### About Town and Country

Miss Cleophas Desmond left last Monday to commence her duties as teacher at Stimson school (south of Ceres).

The highest yield to date brought to our notice, is 29 bushels to the acre. This was obtained on a field of spring breaking on the farm of Mr. William Hall, Benton. Other crops in the Benton district are reported between 20 and 28 bushels.

Mr. G. Heinrich and Mr. T. Norcross, bank inspectors, are in town this week.

Mrs. M. G. Whitlock and family returned to Oyen last Saturday after spending a holiday visiting friends and relatives in Dinmore and Lumsden, Sask.

Mr. Steve Sullivan is assisting Mr. G. G. Caswell as second man at the Pool elevator.

It is estimated that close to 20,000 bushels of wheat of the 1930 crop, have already been hauled to Oyen.

Mr. and Mrs. J. P. Rorabeck returned to Oyen last Saturday morning. In a previous issue of the News it was reported that they had been in an auto collision in North Dakota, while on their holiday. This was incorrect. Their car overturned following a blow-out which occurred about a mile from Granville, McHenry County, N.D. Both Mr. and Mrs. Rorabeck had a miraculous escape, only sustaining slight bruises. The car was badly smashed and it was necessary for them to remain in Granville for four days while the car was being repaired.

A regular meeting of Oyen Ladies aid, will be held at the home of Mrs. Thos. Lees, tomorrow afternoon at 3 o'clock.

Miss Bella Lees commenced her duties as teacher at North Excel school yesterday.

Miss Maxine Sutherland commenced her duties as teacher at Lanfrie school on Monday.

Farmers are invited to inform the News of good yields in their district.

Mrs. McLean and daughter, who have been visiting Mrs. Nash at Benton, returned to Winnipeg this week.

Mr. E. Pfeiffer is at present on relief duty at the Benton depot.

Mr. Edward Peck, who is now residing in Bolton, Lanark, Eng., recently passed the Royal College of Veterinary Surgeons examination obtaining first place.

Mr. E. G. Evans, principal of Oyen high and public schools, arrived in Oyen last Sunday, from Disbursy, Alta, and is staying at the Alberta Hotel.

Mr. E. S. McRory, western manager of the United Grain Growers, was a business visitor in Oyen last week.

Mr. W. S. Marshall was a business visitor in Calgary last week.

Mr. and Mrs. J. Green left last Saturday for North Battleford, to visit at the home of Mrs. Green's parents.

Mr. and Mrs. F. E. Neid and family were guests at the home of Mr. G. G. Caswell last night, on the occasion of the latter's birthday.

Mr. G. N. McLeod, who has been spending a vacation in Winnipeg, Manitoba and Cypress River, Man., returned to Oyen last Monday, to resume his duties on the staff of the local branch of the Bank of Toronto.

Miss A. M. Todd, who teaches grades 3-4-5 in Oyen public school, arrived in Oyen Monday, and is staying at the home of her aunt, Mrs. F. C. McClean.

Everyone will be glad to learn that the family of Mr. and Mrs. E. H. Chude are well on the way to recovery.

Mrs. J. Love, who has been visiting Mr. and Mrs. F. W. Grant at Munson, Alta., returned to Oyen last Monday. Mrs. Grant, who accompanied her mother, will spend a few days visiting here.

Fire broke out in an out-building in W. V. Miller's implement yard last Saturday morning. A quick response to the alarm was made by the fire brigade and no difficulty was experienced in subduing the blaze.

Mr. W. T. England of Calgary is spending a few days in town.

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway program of construction, maintenance and improvement from coast to coast of the Dominion. Program includes laying of branch lines, repairing and renovating of right of way, bridges, tunnels, stations and other buildings. The men in general are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

### Here and There

(258) A spectacular high line trail ride about 7,000 feet above sea level from Banff to Lake Louise has just been inspected and found feasible. Murray Gibson and Jim Brewster. It is 27 miles west of Banff over timber line to a "ride" looking down on the little known glacier-filled Taylor Lake and following the 7,000-foot contour to the Connotation Lake trail leading to Moraine Lake. It commands magnificent views of the alpine country north of the Canadian Pacific Railway west as far as the Bow Lakes and south to Mt. Assiniboine. It is 50 miles long and will probably be used for the annual official camping trip of the Trail Riders of the Canadian Rockies next year.

"I do not believe that the talking films will ever take the place of the legitimate stage. . . . People still appear to be hankering for 'theatre', said Lady Diana Manners, famous English society beauty and equally famous as the heroine of "The Miracle" during her New York and Boston productions, who arrived at the Windsor street station, Montreal, recently, on her first visit to Canada.

The Quebec Festival of French-Canadian Folk Lore and Handicrafts at which brilliant artists born and bred on the soil of Quebec province, and well-known artists from far and wide rival one another in recovering the spirit of Old France, and old New France and the age-old culture of the Old France, will be held this year October 16-18, according to an announcement made by the Canadian Pacific Railway, organizers of the Festival.

Travelling in two Canadian Pacific special trains, about 250 of the most eminent figures in the British medical world left Montreal for Winnipeg, to attend the first convention of the British Medical Association held in Winnipeg. They were preceded by a group of 50 members of the British Tuberculosis Association, who attended a convention of tuberculosis specialists at Nicolet, Man., before going to Winnipeg.

"In view of the fact that this is the last year in which Canada has a seat on the Council of the League of Nations, I could not resist the request made to me by the Prime Minister to represent the Dominion at Geneva," said Sir Robert Laird Borden, former Prime Minister of Canada, as he sailed for Europe recently aboard the Empress of Scotland.
